

MATHDICE[®]

PERFECT MISS

SET B
BASIC

Thank you for participating in our
Math Dice Classroom Program!

We hope you enjoy this week's paper and pencil game.

This packet includes:

- How to Play Instructions
- 16 Challenges
- Solution Sheet

To learn more about our Math Dice Classroom Program, contact

MATHDICE®

PERFECT MISS DISTANCE 3

How To Play

Your Goal:

Solve all three equations to get the indicated Perfect Miss score.

To Play:

Each challenge is packed with three Math Dice challenges. In most of these challenges you will find that you CANNOT HIT the Target Number exactly. That's okay. In this game you are actually trying to MISS the Targets by just the right amount so that when you've solved all three challenges your TOTAL DISTANCE equals the number indicated.

As you solve, you should try to reach the closest number to the Target (if not the Target). This will give you the minimum distance possible. When you've solved all three challenges, add your distances together.

This example has a Distance = 3. Follow the graphic below. We have filled in all information needed to solve the challenge.

Scoring Numbers 3 4 6 Target 24 Equation: $(3 \times 6) + 4 = 22$ Distance From Target: <u>2</u>	Scoring Numbers 2 5 6 Target 15 Equation: $(5 \times 6) / 2 = 15$ Distance From Target: <u>0</u>	Scoring Numbers 2 3 6 Target 34 Equation: $(6^2) - 3 = 33$ Distance From Target: <u>1</u>	Total Distance: 3
Correct Answer Earns 5 pts (Check box & add to Score Sheet) <input type="checkbox"/>			

PERFECT MISS DISTANCE UNKNOWN

You can see the Total Distance in the upper right corner of your challenge worksheets. Distances range from 3-4-5. We also have a set of UNKNOWN DISTANCE challenges. These are fun!
